

COVID-19 Update: Protecting Ourselves and Our Customers

COVID-19 Precautions

Even though our industry functions outside, greatly reducing the chances of coming into contact with other individuals, we're enforcing strict rules to meet CDC and OSHA requirements. Some of the things we're doing include the following:

- Practicing 6-feet social distancing with clients and among crew members
- Washing hands before and after putting on and removing gloves
- Sterilizing steering wheels, armrests and handles on our vehicles
- Prohibiting employees from sharing tools
- Washing and disinfecting tools before putting them away.

“Essential Business”

Because the definition of an “Essential Business” varies greatly between federal, state and local governments, I'm taking this opportunity to remind everyone of the psychological benefits of communities with well-maintained landscaping.

- Well-maintained landscaping can deter crime by creating an “eyes on the street” mentality. It's like having a neighborhood watch sign on your property.
- Without landscape services fields, parks, businesses, and homes would become overgrown and unkept causing dramatic, negative psychological effects on the mental wellbeing of the people in our neighborhoods and communities.

Spring is a critical time of year due to the abundance of growth requiring prompt maintenance and care. Any delay in maintaining landscaping magnifies problems making them more difficult to manage later in the year.

As the growing season progresses, our schedule becomes tighter. To continue to provide you with prompt service, please allow us plenty of notice for new projects.

Thank you very much for your business! We truly appreciate you, and we appreciate your support.

Sincerely,

April Algaier
Operator, Manager, Designer

We love making your landscape healthy and beautiful!
